Address: \_\_\_\_\_

Tenant: \_\_\_\_\_

Phone: \_\_\_\_\_

Owner: \_\_\_\_\_

Phone: \_\_\_\_\_

Gross Bldg Area: \_\_\_\_\_ sq ft

Designated Storage Area: \_\_\_\_\_ sq ft

The Richland Fire and Emergency Services Department's review of this project indicates there is a potential for storage or use of hazardous materials as defined by the International Fire Code (IFC). If this is the case, special fire protection features may be required beyond those specified in the regular plan review.

Please check the appropriate box below, sign and return this form to the Richland Fire Marshal's Office at the address listed below. If you have questions, please contact (509) 942-7703. If additional protection features are required, you will be notified.

## DECLARATION OF NON-HAZARDOUS MATERIALS:

This building will not be used for storage or use of hazardous materials as determined by the International Fire Code:

- **HAZARDOUS MATERIALS** are those chemicals or substances, which are physical hazards or health hazards as defined and classified in IFC whether the materials are in usable or waste condition. This includes any flammable and combustible liquids, radioactive materials, radiation producing sources, oxidizers, toxic and explosive substances, including pesticides, or biological hazards.

This building is a speculation building without a tenant at this time. The tenant will be notified there may be special fire department requirements for storage or use of hazardous materials, and will be advised to contact the fire department for permits prior to occupancy.

## HAZARDOUS MATERIALS DECLARATION:

This building will be used for storage or use of hazardous materials as noted, and will be designed to conform to International Fire Code requirements. A fire department permit is required. **NOTE: If you checked this box, complete Page 2 of this form.**

# HAZARDOUS MATERIALS STORAGE & USE

## Owner's Statement of Intended Use

Address: \_\_\_\_\_

Please answer all questions. The detail of the description will help to classify commodities and storage areas for your facility. This information will be used to establish the fire protection requirements for any hazardous materials storage or use.

Mixed commodity classifications must be protected to the highest commodity classification unless it can be shown by engineering analysis the fire protection equipment can protect the hazard.

1. Describe the hazardous materials to be stored. Provide a detailed description of the product(s), packing materials, and containers. Products that are packaged with Group A expanded or unexpanded plastics should be described with the amount of each plastic by weight or volume. (If more than one hazardous material complete separate form for each material.)
  - a. Common or trade name, chemical name, hazardous ingredients for hazardous material(s): \_\_\_\_\_
  - b. Type of packing material or container: \_\_\_\_\_ Size of container(s): \_\_\_\_\_
  - c. Maximum quantities of material to be stored or used at this site: \_\_\_\_\_
  - d. Is SDS available on site?     YES     NO    *(Attach copy of SDS to this form)*
2. Describe the method of storage. Provide a description of the method of storage such as in approved hazardous materials storage cabinets, in unapproved closed cabinets, on open shelving, in solid piles, on racks, on pallets, loose, mixed, etc.  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
3. Specify the amount of area designated for hazardous materials storage:        \_\_\_\_\_ sq ft
4. Specify the maximum height of the storage:        \_\_\_\_\_ ft
5. Are any commodities stored on plastic pallets?     YES     NO
